If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: _____

Inventors (please provide full names): _____

Earliest Priority Filing Date: _____

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

Publication Stage :

(B1) U.S. Patent (no pre-grant pub.) after Jan. 2, 2001

Abstract :

An eye shield assembly is provided for use in conjunction with a hat having a brim. The eye shield assembly includes a frame and a lens mounted to the frame. The opposite sides of the frame are pivotally secured to the hat brim so that the frame is movable between a storage position and an operational position. In its storage position, the lens nests closely adjacent to the brim while in the operational position, the lens depends generally perpendicularly downwardly from the brim.
